Royal Canadian  
Mint logo pattern

### History

Since 1908 the Royal Canadian Mint (RCM) has been responsible for minting bullions and collectible pieces alike for Canada and for nations around the world. It's also the only accredited gold refiner in North America manufacturing minted gold investment bars. The RCM's reputation and standard of quality make these bars a wise and convenient choice for the portfolios of investors looking to increase their gold as well as for tangible asset purposes.

### Production: Royal Canadian Mint

These 1 oz. bars of .9999 (99.99%) gold produced by the Royal Canadian Mint are refined to the highest standards of fine gold. Each bar contains 24 karats of pure gold and is created in a rectangular design with rough round edges. The front of the bar is inscribed with the words Royal Canadian Mint in English and in French. Below you will find 1 oz. of .9999 (99.99%) pure fine gold engraved with a unique serial number known as the ingot's certified registration number. The reverse shows the Royal Canadian Mint Logo in a very clean pattern creating a very distinguished presentation. The bars also come with a certificate of authenticity that matches the ingot's registration number.
