

Position Title: QA Tester

Position Type

Full-Time

Work Authorization

U.S Citizen or U.S. National, Permanent U.S. Resident

Description

QA Tester will be constantly involved in newly developed project testing, as well as previously rolled out features. Tester will have to keep constant communication between developers, CXI members and customers to insure solid understanding of customer needs and what needs to be delivered. Tester has to be able to express problems well enough that developers can fix the issue as quickly as possible. Tester will work with the Testing team to assist with the preparation of test plans and the testing of software adhering to company guidelines and standards. Tester will run functional tests, customer scenario testing, stress testing and automated testing. The ultimate goal of the tester will be to clean out any bugs and improve the quality of our software. Tester will be closely involved with documenting CXI's software procedures, which are essential for expanding CXI as a company. As a member of the support team, the Tester will be responsible for communicating with users (internal and external) about issues encountered in the system, and either resolve them or escalate to other members of the team.

Requirements:

Must have a deep understanding of computer programming (PHP, JavaScript, MySQL); Knowledge of methods and processes used in quality assurance of software programs; Knowledge and understanding online software development process; Must be detailed oriented, problem solver and organized; Excellent writing and documenting skills, as well as oral communication; Ability to clearly communicate with non-technical personnel; Has to be self-motivated, work on your own and in the team environment
