

# DIGITAL REMOTE DEPOSIT CAD CHECKS

## There is a new age for clearing Canadian checks.

*Remote capture technology allows organizations to simply scan checks drawn on Canadian accounts and send them digitally to CXI for clearing. Take an integrated end-to-end check clearing approach to processing Canadian checks.*

### SCAN CHECKS TO PROCESS DIGITALLY

- Uses X9 file type - most Check 21 compliant scanners are compatible
- Digitally endorse checks
- Process bulk checks quicker
- No more bundling or shipping CAD checks

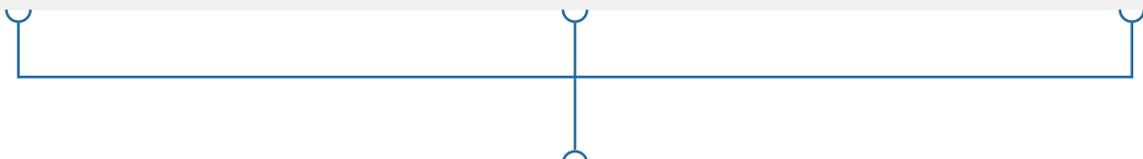

### CHECKS ARE SCREENED THROUGH WATCH LISTS

- Integrated OFAC scan checks remitter, beneficiary, and bank drawn upon fields
- Compliance Verification System allows for live compliance checks of regulatory watch lists

### SAFE AND SECURE TRANSMISSION

- Increase security with fewer touch points in shipping and handling
- Validate MICR line
- Reduce entry errors and lost and damaged checks

### CLEAR CHECKS FASTER, SAFER, AND MORE SECURELY

- Real-time validation and transmission can expedite reconciliation time
- Reduce potential delays, errors, and fees for an enhanced processing experience
- Utilize established resources to take advantage of digital remote deposit technology
