1. Nature of Operations and Basis of Presentation

Nature of operations

Currency Exchange International, Corp. (the "**Company**") was originally incorporated under the name Currency Exchange International, Inc. under the Florida Business Corporation Act on April 7, 1998. The Company changed its name to Currency Exchange International, Corp. on October 19, 2007 and commenced its current business operations at that time. The Company is a public corporation whose shares are listed and posted for trading on the Toronto Stock Exchange ("**TSX**") under the symbol "CXI," and the over the counter market ("**OTCBB**") in the United States under the symbol "CURN". The Company operates as a money service and payments business that provides currency exchange, wire transfer, and cheque cashing services from its locations in the United States and Canada. The Company maintains a head office and 5 vaults as well as 35 branch locations (see Note 10), and 262 employees. The Company's registered head office is located at 6675 Westwood Boulevard, Suite 300, Orlando, Florida, 32821, United States of America. The Company's wholly-owned Canadian Subsidiary, Exchange Bank of Canada ("**EBC**") is a non-deposit taking, non-lending "Schedule 1" bank engaged in foreign exchange services.

Basis of presentation

The presentation currency of the Company's condensed interim consolidated financial statements is the U.S. Dollar. The accounting policies set out in Note 2 in the annual audited consolidated financial statements have been applied consistently to all periods presented in these condensed interim consolidated financial statements. These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which are stated at their fair value: financial instruments classified as fair value through profit or loss ("**FVTPL**"), foreign currency forward and option contracts, contingent consideration and share-based payment plans. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Statement of compliance

The condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("**IFRS**") as issued by the International Accounting Standards Board ("**IASB**").

These condensed interim consolidated financial statements were authorized for issue and approved by the Board of Directors on June 10, 2021.

2. Accounting Policies

Principles of consolidation

The condensed interim consolidated financial statements comprise the financial statements of the Company and its wholly-owned subsidiaries, EBC, a Schedule 1 bank in Canada, and eZforex.com, Inc. ("eZforex"), a Texas-based money service business. Subsidiaries are entities over which the Company has control, where control is defined as the power to govern financial and operating policies of an entity so as to obtain benefit from its activities. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date control ceases. All material intercompany transactions are eliminated on consolidation.

2. Accounting Policies (continued)

Recently adopted accounting standards

Certain pronouncements were issued by the IASB or International Financial Reporting Interpretations Committee ("**IFRIC**"). Many are not applicable or do not have a significant impact to the Company, including IFRIC 23 *Uncertainty Over Income Tax Treatments*, and have been excluded.

Future Accounting Pronouncements

Certain pronouncements were issued by the IASB or International Financial Reporting Interpretations Committee ("**IFRIC**"). Many are not applicable or do not have a significant impact to the Company and have been excluded. The following amended standards and interpretations have not yet been adopted and are not expected to have a significant impact on the Company's condensed interim consolidated financial statements:

- Amendments to References to Conceptual Framework in IFRS Standards;
- Definition of a Business (Amendments to IFRS 3);
- Definition of Material (Amendments to IAS 1 and IAS 8); and
- IFRS 17 Insurance Contracts.

Accounting for government grants and assistance

The Canada Emergency Wage Subsidy ("CEWS") program became effective for periods beginning on March 15, 2020 to support organizations that have been significantly impacted by the COVID-19 pandemic. Under this program, EBC received a subsidy of up to 75% of qualified employees' wages in each qualifying four-week period that it met certain tests for revenue reduction. For the three and six-months ended April 30, 2021, EBC qualified for $400,152 and $550,448 (October 31, 2020 - $745,190) in grants under the program, of which $188,824 (October 30, 2020 - $198,990) was a receivable as of the reporting date. The Canada Emergency Rent Subsidy ("CERS") program became effective for periods beginning on September 27, 2020. Under this program, EBC received a subsidy for up to 68% of qualified rent expenses. For the three and six-months ended April 30, 2021 EBC qualified for $72,969 and $101,709 (October 31, 2020 - $16,343) which was a receivable as of the reporting date. There are no obligations, commitments or conditions associated with the programs that could create a requirement to repay all or a part of the grants. The grant revenue has been recognized by the Company separately as other income, "government grants," within the statement of operations.

Share-based payments

The Company's Deferred Share Unit ("DSU") Plan and Restricted Stock Unit ("RSU") Plan (collectively the "Plans") allow certain employees and directors to receive restricted and deferred share units ("Units") of the Company. The Units are cash-settled only and are therefore classified as a financial liability. The Units are measured at the fair value of the Company's equity instruments at the grant date as a financial liability in the condensed interim consolidated statement of financial position. The fair value determined at the grant date of the cash-settled share-based payments is expensed on a straight-line basis over the period during which the employees and directors become unconditionally entitled to the instrument. At the end of each reporting period, the Company revises its estimate of the Unit's liability based on the fair value of the Company's equity instruments. The impact of the revision of the original estimates, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the liability.

3. Significant management judgment in applying accounting policies and estimation uncertainty

When preparing the condensed interim consolidated financial statements, management undertakes a number of judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from judgments, estimates and assumptions made by management, and will seldom equal the estimated results.

The judgments, estimates and assumptions applied in the condensed interim consolidated financial statements, including the key sources of estimation uncertainty, were the same as those applied in the Company's last annual consolidated financial statements for the year ended October 31, 2020. The only exceptions are the estimate of income taxes, which are determined in the condensed interim consolidated financial statements using the estimated average annual effective income tax rate applied to the pre-tax income of the interim period.

4. Acquisition

Denarius Financial Group Inc.

On July 29, 2020 the Company's wholly-owned subsidiary, EBC, acquired certain assets of Denarius Financial Group Inc. ("DFG"), which were determined to meet the definition of a business in accordance with IFRS 3 *Business Combinations*.

EBC paid $2,748,290 (CAD 3,660,000) in cash on closing, and EBC's parent company Currency Exchange International ("CXI") issued 18,000 fully vested stock options to the shareholders of the vendor on the date of acquisition. In addition, there are two contingent payments of up to a maximum of $375,432 (CAD 500,000) each and payable on the first and second anniversary after closing. The additional payments will be based on the amount of revenue generated from the customer trading relationships acquired. The Company has estimated the likelihood of future revenues to determine the estimated contingent consideration. Management had estimated these payments for the first and second anniversary at $343,894 (CAD 457,998) and $359,666 (CAD 479,003) respectively, for total contingent consideration of $727,130 (CAD 968,392). The Company allocated this contingent consideration to customer trading relationships.

An increase (decrease) in the estimate of the amount of revenue generated from the customer trading relationships acquired of +/- 10% would not affect the fair value of the contingent consideration. Contingent consideration was reassessed at the end of the reporting period and the initial estimate was still determined to be management's best estimate of the Company's obligation. Changes in contingent consideration noted on the statements of financial position are a result of foreign exchange fluctuations.

Assets assumed in the acquisition have been recorded at their fair values as at the date of acquisition. The Company completed its measurement process once the necessary information was obtained and finalized the purchase price allocation as at October 31, 2020.

(Expressed in U.S. Dollars)

4. Acquisition (continued)

The final purchase price of the DFG acquisition was $3,483,615 (CAD 4,639,481), with the final allocation of the purchase consideration to the net assets acquired as follows:

	USD	CAD
Final PPA allocation

Total	53,467,337	59,311,553

7. Restricted Cash Held in Escrow

Certain of the Company's secured transactions and derivative contracts require the Company to post cash collateral or maintain minimum cash balances in escrow. The foreign currency forward contracts can be closed immediately resulting in the collateral being liquidated. The Company has also been required to post the collateral associated with its new credit facility with Desjardins Group (see Note 12). At April 30 , 2021 the Company had cash collateral balances of $2,730,013 (October 31, 2020 - $2,963,474), represented by $1,170,964 (October 31, 2020 - $1,461,747) being held as collateral on forward contracts and $1,559,049 (October 31, 2020 - $1,501,727) being held on collateral on the Desjardins credit facility. These balances are reflected as restricted cash held in escrow in the condensed interim consolidated statements of financial position.

9. Goodwill and Intangible Assets

Intangible assets comprise the Company's internally developed software ("**CXIFX**") and its related modules as well as software and customer trading relationships acquired through an asset purchase transaction as well as the purchase of eZforex (*see Note 5 in the audited consolidated financial statements at October 31, 2020*) and DFG (*see Note 4).* Amortization for intangibles is computed on an individual basis over the estimated useful life using the straight-line method as follows:

10. Leases

Lease liabilities are presented in the statement of financial position as follows:

	April 30, 2021	October 31, 2020
	$	$
Current lease liabilities	1,474,935	1,749,727
Non-current lease liabilities	3,185,045	3,455,107
Total	**4,659,980**	**5,204,834**

The Company has leases for corporate offices as well as its retail store locations. With the exception of short-term leases and leases of low-value underlying assets, each lease, meeting the definition under IFRS 16, is reflected on the statements of financial position as a right-of-use asset and a lease liability. Variable lease payments which do not depend on an index or a rate (such as lease payments based on a percentage of Company sales) are excluded from the initial measurement of the lease liability and asset. The Company classifies its right-of-use assets in a consistent manner to its property, plant and equipment (see Note 8).

Each lease generally imposes a restriction that, unless there is a contractual right for the Company to sublet the asset to another party, the right-of-use asset can only be used by the Company. Leases are either non-cancellable or may only be cancelled by incurring a substantial termination fee. Some leases contain an option to extend the lease for a further term. The Company is prohibited from selling or pledging the underlying leased assets as security. For leases over corporate offices and retail store locations, the Company must keep those properties in a good state of repair and return the properties in their original condition at the end of the lease.

The table below describes the nature of the Company's leasing activities by type of right-of-use asset recognized on balance sheet:

Right-of-use asset	No of right-of-use assets leased	Range of remaining term	Average remaining lease term	No of leases with extension options	No of lease with options to purchase	No of leases with variable payments linked to an index	No of leases with termination options
Equipment	1	3 years	3	1	-	-	-
Corporate offices	12	0-13 years	3	5	-	-	-
Retail store locations	18	0-6 years	2	1	-	-	1
Total	**31**	**0-13 years**	**2**	**7**	**0**	**0**	**1**

The lease liabilities are secured by the related underlying assets. Future minimum lease payments at April 30, 2021 were as follows:

	Within 1 Year	1-2 years	2-3 years	3-4 years	4-5 years	After 5 Years	Total
Lease payments	1,647,551	866,001	499,752	430,469	390,717	1,609,187	5,443,678
Finance charges	172,616	126,971	104,854	89,223	74,727	215,307	783,698
Net present values	**1,474,935**	**739,030**	**394,898**	**341,247**	**315,990**	**1,393,880**	**4,659,980**

(Expressed in U.S. Dollars)

10. Leases (continued)

The Company has elected not to recognize a lease liability for short term leases (leases with an expected term of 12 months or less) or for leases of low value assets. In addition, the Company has not recognized a right-of-use asset or lease liability with respect to leases identified where the lessor was determined to have substantive substitution rights. Payments made under such leases are expensed on a straight-line basis. In addition, certain variable lease payments are not permitted to be recognized as lease liabilities and are expensed as incurred.

The expense relating to payments not included in the measurement of the lease liability is as follows:

	Six-months ended		Three-months ended	
	April 30, 2021	April 30, 2020	April 30, 2021	April 30, 2020
	$	$	$	$
Leases with substantial substitution rights	229,001	362,946	111,368	183,222
Short-term leases	61,934	108,743	28,960	56,707
Variable lease payments	155,381	272,523	68,874	106,817
Total	**446,316**	**744,212**	**209,202**	**346,746**

At April 30, 2021, the Company was committed to short-term leases and the total commitment at that date was $61,934.

Total cash outflow for leases for the six-months ended April 30, 2021 was $1,039,063.

Additional information on the right-of-use assets by class of assets is as follows:

	Carrying Amount	Depreciation Expense	Impairment
	$	$	$
Equipment	4,144	758	-
Corporate offices	2,338,956	282,758	-
Retail store locations	1,576,077	557,572	23,685
Total right-of-use assets	**3,919,177**	**841,087**	**23,685**

11. Seasonality of Operations and Impact of Global Pandemic

Seasonality is reflected in the timing of when foreign currencies are in greater or lower demand. In a normal operating year there is some seasonality to the Company's operations with higher commissions generally from March until September and lower commissions from October to February. This coincides with peak tourism seasons in North America when there are generally more travelers entering and leaving the United States and Canada.

On March 11, 2020 the World Health Organization officially declared COVID-19, the disease caused by a novel coronavirus (“COVID-19“), a pandemic. The spread of COVID-19 has severely impacted many local economies around the globe. In many countries, including Canada and the United States of America, businesses have been forced to cease or limit operations for long or indefinite periods of time. Measures have been taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of nonessential services. These measures have triggered significant disruptions to business worldwide, resulting in reduced economic activity.

11. Seasonality of Operations and Impact of Global Pandemic (continued)

The Company implemented a number of measures since the pandemic was declared. Those comprise the closing of 12 branch locations, partially offset by the opening of 1 location in the six-month period ended April 30, 2021, resulting in a 24% reduction of retail locations to 35 at April 30, 2021 from 46 at April 30, 2020. In addition, the Company has reduced its net employee population by 98, to 262 at April 30, 2021 from 363 at March 11, 2020. The Company also closed one vault in the six-month period ended April 30, 2020 due to the low volume of demand for banknotes, which has remained closed at April 30, 2021.

As of April 30, 2021, the Company recorded an additional expense of $102,544 related to variable costs associated with the closing of a corporate office. This office was closed as part of the Company's restructuring actions, triggered by the pandemic in fiscal year 2020. These were driven by updated assumptions made by Management related to their ability to mitigate obligations for such corporate office.

Governments and central banks have responded with monetary and fiscal interventions to stabilize economic conditions (see Note 2). While the Company continues to operate, it is not possible to reliably estimate the duration and severity of these consequences as well as their impact on the financial position and results of future periods.

12. Lines of Credit

The Company maintains a line of credit to meet borrowing needs during peak business periods. The Company has a revolving line of credit with BMO Harris Bank, N.A. with a limit of $20,000,000. The credit line is secured against the Company's cash and other assets. The line of credit bears interest at LIBOR plus 2.0% (at April 30, 2021 – 2.11% (October 31, 2020 – 2.15%)). At April 30, 2021, the balance outstanding was $340,939 (October 31, 2020 - $Nil).

On January 25, 2021, the Company's wholly-owned Canadian subsidiary, EBC, terminated its revolving line of credit with Bank of Montreal that had a limit of CAD 6,000,000 ($4,694,836). That line of credit bore interest at CAD prime plus 0.5% [at January 31, 2021 – 2.95% (October 31, 2020 – 2.95%)]. At January 31, 2021, the balance outstanding was $Nil (October 31, 2020 - $3,305,605). In its place, the Bank established a fully collateralized revolving line of credit with Desjardins Group ("Desjardins") on October 19, 2020 with a limit of CAD 2,000,000 ($1,564,945), being secured against cash collateral of CAD 2,000,000 ($1,564,945). The line of credit bears interest at CAD prime rate plus 0.25% (at April 30, 2021- 2.70% (October 31, 2020 – 2.70%)). At April 30, 2021, the balance outstanding was $94,825 (October 31, 2020 - $Nil)

On April 7, 2021, EBC entered into a Revolving Credit Facility with a private lender. The facility is guaranteed by the parent company and is subordinated to the parent company's and EBC's obligations to its primary lenders. The facility will be used for working capital purposes of daily operational activity. The credit facility has a limit of $10,000,000 USD, with the option to increase the limit by mutual consent to $20,000,000, with a term of three years (maturity date April 7, 2024). It bears interest at 6% per annum, and has a standby charge of $1,500 USD per month if total interest in the month is less than $20,000 USD. At April 30,2021, the balance outstanding was $Nil.

Interest expense relates to interest payments on lines of credit. Interest expense for the three-and six-month period ended April 30, 2021 was $51,283 and $ 131,569 (April 30, 2020 - $149,103 and $287,305).

13. Fair Value Measurement of Financial Instruments

IAS 34 requires that financial statements include certain disclosures about the fair value of financial instruments as set out in IFRS 13 and IFRS 7. These disclosures include the classification of fair values within a three-Level hierarchy. The three Levels are defined based on the observation of significant inputs to the measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: unobservable inputs for the asset or liability

The fair value determination is the estimated amount that the Company would receive to sell a financial asset or pay to transfer a financial liability in an orderly transaction between market participants at the measurement date.

There were no transfers between Level 1 and Level 2 during the three-and six-month period ended April 30, 2021 and the year ended October 31, 2020. The following table shows the Levels within the hierarchy of financial assets and liabilities measured at fair value.

Total liabilities	**-**	**-**	**703,560**	**703,560**

13. Fair Value Measurement of Financial Instruments (continued)

Cash (Level 1)

The Company’s cash balances consisting of local and foreign currency notes held in tills, vaults, bank accounts, and in transit are based upon foreign exchange rates quoted in active markets as of April 30, 2021 and October 31, 2020.

Forward and option contract positions, and Restricted and Deferred share units (Level 2)

The Restricted and Deferred share units are valued using a volume-weighted average price for the five days that precede the date of grant. The cost of the awards is recorded on a straight-line basis over the vesting period. At each reporting date, the vested portion of the awards are remeasured at the current fair value using the same approach as at initial recognition (see Note 16).

The Company’s forward contract positions are not traded in active markets. The fair value of these instruments has been determined using observable forward exchange rates. The effects of non-observable inputs are not significant for foreign contract positions.

Contingent consideration (Level 3)

The fair value of contingent consideration, related to the DFG business, is estimated based on the amount of revenue generated from the acquired customer trading relationships. The significant input for the fair value estimate is management’s estimate of revenues from acquired customers to continue transacting with the Company. For information about the sensitivity of the fair value measurement to the changes in the input at October 31, 2020, see Note 4. The fair value estimate of future cash outflows is $762,720 at April 30, 2021. This reflects management’s best estimate of a retention rate of key acquired customers in year 1 and in year 2.

Due to their short-term nature, the carrying value of the following financial instruments approximates their fair value at the balance sheet date:

- Accounts receivable;
- Restricted cash held in escrow;
- Accounts payable;
- Holding accounts;
- Lines of credit; and
- Contract liability

14. Risk Management

The Company's activities expose it to a variety of financial risks: credit risk, foreign currency risk, interest rate risk, and liquidity risk. The Company's risk management policies are designed to minimize the potential adverse effects on the Company's financial performance.

Financial risk management is carried out by the Chief Financial Officer (“**CFO**”) under policies approved by senior management and the Board of Directors. Policies are in place to evaluate and monitor risk and in some cases, prescribe that the Company hedge its financial risks.

(Expressed in U.S. Dollars)

14. Risk Management (continued)

The analysis below presents information about the Company's exposure to each of these financial risks arising from financial instruments and the Company's objectives, policies and processes for measuring and managing these risks.

Credit Risk

Credit risk is the risk of financial loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash in bank accounts, accounts receivable and forward contracts from hedging counterparties.

All banking relationships are negotiated by senior management. The Company maintains accounts in high quality financial institutions. At various times, the Company's bank balances exceed insured limits.

The credit risk associated with accounts receivable is limited, as the Company's receivables consist primarily of bulk currency trades with a settlement cycle of 24 to 48 hours. The majority of the Company's receivables reside with banks, money service business customers and other financial institutions. Due to seasonality, amounts in accounts receivable are usually at their highest during peak periods. Accounts receivable balances were lower than normal at April 30, 2021 due to the reduction in activity caused by the ongoing pandemic. However, the Company has experienced a steady increase in activity and operations, resulting in an increase in accounts receivable of $3,529,000 from April 30, 2020 to April 30, 2021. The Company has longstanding relationships with most of its money service business customers and has a strong repayment history, with one exception (see Note 21).

For the purpose of risk control, the customers are grouped as follows: domestic and international banks, money service businesses, and other customers. Credit limits are established for each customer, whereby the credit limit represents the maximum open amount without requiring payments in advance. These limits are reviewed regularly by senior management.

A breakdown of accounts receivable by category is below:

	At April 30, 2021	At October 31, 2020
Customer type	**$**	**$**
Domestic and international banks	3,998,510	2,923,202
Money service businesses	1,130,219	846,168
Other	466,904	2,141,993
Total	**5,595,633**	**5,911,363**

The maximum exposure to credit risk is represented by the carrying amount of each financial asset on the statement of financial position. There are no commitments that could increase this exposure to more than the carrying amount.

Foreign Currency Risk

The volatility of the Company's foreign currency holdings may increase as a result of the political and financial environment of the corresponding issuing country. Several currencies have limited exchange rate exposure as they are pegged to the U.S. Dollar, the reporting currency of the Company. Management

14. Risk Management (continued)

believes its exposure to foreign currency fluctuations is mitigated by the short-term nature and rapid turnover of its foreign currency inventory, as well as the use in certain instances of forward contracts to offset these fluctuations. Due to their nature, some minor and exotic foreign currencies cannot be hedged or are too cost prohibitive to hedge.

In order to mitigate the risks associated with holding these foreign currencies, the Company assigns wider bid/ask spreads and maintains specific inventory targets to minimize the impact of exchange rate fluctuations. These targets are reviewed regularly and are increased or decreased to accommodate demand within acceptable risk tolerances. The amount of unhedged inventory held in tills, vaults and in transit at April 30, 2021 was approximately $4,988,000 (October 31, 2020 - $6,010,000). The amount of currency that is unhedged and that is not pegged to the U.S. Dollar is approximately $3,614,000 (October 31, 2020- $4,672,000). A 2% increase/reduction in the market price for the aggregate of the Company's unhedged/un-pegged foreign currencies would result in an exchange gain/loss of approximately +$72,000/-$72,000 (October 31, 2020 gain/loss of approximately +$93,000/-$93,000).

On a consolidated basis, the Company is also exposed to foreign currency fluctuations between the U.S. Dollar and the Canadian Dollar, being the functional currency of its Canadian subsidiary. The Company does not hedge its net investment in its Canadian subsidiary and the related foreign currency translation of its earnings.

Interest Rate Risk

At April 30, 2021, the Company had access to interest bearing financial instruments in cash, short term accounts payable and line of credit. A significant amount of the Company's cash is held as foreign currency bank notes in tills and vaults. These amounts are not subject to interest rate risk. Cash held in some of the Company’s accounts are interest bearing; however, since prevailing interest rates are low there is minimal interest rate risk. Borrowings bear interest at variable rates. Cash and borrowings issued at variable rates expose the Company to cash flow interest rate risk. For the interest rate profile of the Company's interest-bearing financial liabilities, refer to Note 12.

The Company manages interest rate risk in order to reduce the volatility of the financial results as a consequence of interest rate movements. For the decision whether new borrowings shall be arranged at a variable or fixed interest rate, senior management focuses on an internal long-term benchmark interest rate and considers the amount of cash currently held at a variable interest rate. Currently the interest rate exposure is un-hedged.

If interest rates had been 50 basis points higher/lower with all other variables held constant, after tax profit for the six-months ended April 30, 2021 would have been approximately +$16,000/-$16,000 higher/lower as a result of credit lines held at variable interest rates.

Liquidity Risk

Liquidity Risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The CFO informs the Chief Executive Officer, the Board of Directors, and the Audit Committee of capital and liquidity issues as they occur in accordance with established policies and guidelines. The Company targets to have a cash reserve or credit lines greater than 15% of the Company's prior year's revenues. Management has assessed the Company’s cash position at April 30, 2021 and determined that it is sufficient to meet its financial obligations despite the reduction in revenue related to COVID-19.

The Company had available unused lines of credit amounting to $31,127,301 at April 30, 2021 (October 31, 2020 - $22,701,303).

Capital Management

The Company manages capital through its financial and operational forecasting processes. The Company defines working capital as total current assets less current liabilities. The Company reviews its working capital and forecasts its cash flows based on operating expenditures, and other investing and financing activities related to its daily operations.

	At April 30, 2021	**At October 31, 2020**
Current assets	65,834,662	71,219,313
Current liabilities	(19,103,431)	(23,463,619)
Working capital	**46,731,231**	**47,755,694**

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, obtaining loan financing, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

15. Foreign Currency Forward and Option Contracts

The Company enters into foreign currency forward and purchase put option contracts to mitigate the risk of fluctuations in the exchange rates of its holdings of major currencies. Changes in the fair value of the contracts and the corresponding gains or losses are recorded daily and are included in commission revenues in the consolidated statements of operations and other comprehensive (loss) income. The Company's management strategy is to reduce the risk of fluctuations associated with foreign exchange rate changes.

The foreign currency forward contracts can be closed immediately resulting in the collateral being liquidated. The foreign currency option contracts are held to maturity and are either exercised for a net gain or expire at no obligation to the Company.

The fair value of forward and option contracts, which represents the amount that would be received/(paid) by the Company if the forward contracts were terminated at April 30, 2021 was $111,507 (October 31, 2020 - $92,447).

At April 30, 2021 the Company had cash collateral balances related to forward contracts being held of $1,170,964 (October 31, 2020 - $1,461,747). They are reflected as restricted cash held in escrow in the consolidated statements of financial position (see Note 7).

16. Equity

Share Capital

The authorized share capital consists of 100,000,000 common shares. The common shares have a par value of $1.00. Between May 1, 2019 and April 30, 2021, only 845 shares have been issued, with a value of $61,316. These were added because of stock options exercised in Q4 2019.

Stock options

The Company offers an incentive stock option plan which was established April 28, 2011 and was amended most recently October 20, 2017 (the "**Plan**"). The Plan is a rolling stock option plan, under which 10% of the outstanding shares at any given time are available for issuance thereunder. The purpose of the Plan is to promote the profitability and growth of the Company by facilitating the efforts of the Company to attract and retain directors, senior officers, employees, and management. Under the terms of the Plan, vesting for management under the Plan will occur 1/3 upon the first anniversary, 1/3 upon the second anniversary and 1/3 upon the third anniversary of the grant, while vesting for directors under the plan will occur equally on a quarterly basis in the first year after the grant. All the options have a five-year term, unless otherwise specified by the Board of Directors.

Restricted Stock Unit and Deferred Stock Unit Plans

On November 1, 2020 the Company made its first grants under the Deferred Share Unit “DSU” Plan and Restricted Stock Unit “RSU” Plan (collectively the "Plans"). The Company granted 47,144 RSU and 29,596 DSU awards in the amount of $388,000 and $220,000 respectively. The Company recorded expenses of $294,521 related to RSU and DSU awards in the six-month period ended April 30, 2021 as part of stock-based compensation. The amounts related to the vested portions of granted RSU and DSU awards are recorded within other long-term liabilities in the consolidated statement of financial position. The awards that may be granted under each of the Plans can be realized in cash only and may not be converted into common shares of the Company. The Units awarded are issued based upon the market value equal to the price of the Company’s stock price as at the date of the grant and vest over a one-year or three-year period.

The purpose of these Plans is to promote the profitability and growth of the Company by facilitating the efforts of the Company to attract and retain directors, senior officers, employees, and management. Under the terms of the Plans, vesting of the awards that may be granted under the Plans for management will occur 1/3 upon the first anniversary, 1/3 upon the second anniversary and 1/3 upon the third anniversary of the grant, while vesting for awards that may be granted under the Plans for directors will occur equally on a quarterly basis in the first year after the grant. All the management awards have a three-year term, unless otherwise specified by the Board of Directors. The Directors’ awards cannot be exercised until the Director retires from the Board.

17. Loss per Share

The calculation of earnings per share is presented below. 19. Compensation of Key Management Personnel and Related Party Transactions

In accordance with IAS 24 *Related Party Disclosures*, key management personnel are those persons having authority and responsibility for planning, directing and controlling activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company. The remuneration of directors and other members of key management personnel during the three-and six-month periods ended April 30, 2021 and 2020 was as follows:

	Six-months ended		Three-months ended	
	April 30, 2021	April 30, 2020	April 30, 2021	April 30, 2020

The Company incurred legal and professional fees in the aggregate of $19,677 and $80,622 for the three- and six-month periods ended April 30, 2021 (2020 - $57,078 and $102,990) charged by entities controlled by directors or officers of the Company.

(Expressed in U.S. Dollars)

19. Compensation of Key Management Personnel and Related Party Transactions (continued)

The Company has clients that are considered related parties through two of its directors. The Company generated $5,399 and $22,990 in revenue from these clients' activities for the three-and six-month period ended April 30, 2021 (2020 – $14,715 and $52,988). As at April 30, 2021, accounts receivable included $32,812 from related parties (2020 - $79,049).

On October 1, 2011, the Company entered into an employment agreement with the President and CEO of the Company. Such agreement contains clauses requiring additional payments of a minimum of $450,000 to be made upon the occurrence of certain events such as a change of control of the Company or termination for reasons other than cause. As the likelihood of a change of control of the Company is not determinable, the contingent payments have not been reflected in the condensed interim consolidated financial statements.

Advances between CXI and EBC are provided under a $20,000,000 Revolving Line of Credit, renewed July 1, 2018 loans attract interest at LIBOR + 2%, are repayable on demand, and are unsecured. At April 30, 2021, the intercompany loan balance was $12,937,423 (October 31, 2020 - $8,565,000) and was eliminated upon consolidation.

Key management personnel and directors occasionally conduct transactions with the Company as individuals. Such transactions are immaterial individually and in total including for the three-and six-month periods ending April 30, 2021 and 2020, and are conducted pursuant to the Company's policies.

All transactions with related parties as noted above are carried out in the normal course of business and at prevailing market rates.

21. Loss provision and contingent asset

A wholesale customer of the Company that owed money to the Company filed a Notice of Intention to Make a Proposal to its creditors under the Bankruptcy and Insolvency Act (Canada) ("BIA") on April 30, 2020. At April 30, 2020 the Company recorded a loss provision of $1,012,946 (CAD 1,424,000) for amounts owed to it by the customer. Such customer subsequently failed to make a proposal to its creditors and was automatically placed into Bankruptcy on June 30, 2020, resulting in the Company becoming an unsecured creditor of the bankrupt customer's estate. Subsequent to September 9, 2020 the Trustee in Bankruptcy has claimed that three payments that the customer made to the Company in April 2020 that total $1,000,000

21. Loss provision and contingent asset (continued)

were made within 90 days of the date of bankruptcy, and therefore were preferential, in contravention of the BIA. At October 31, 2020 the Company recorded an additional provision of $675,000 (CAD 898,965) as a reasonable estimate of the expected future cash outflows with respect to this customer's bankruptcy. In April 2021, the Company entered into an agreement with the Trustee in Bankruptcy to return $825,000 of the alleged preference payments and in exchange the Trustee accepted the Company's claims, totaling $1,825,000, against the bankrupt's assets. The settlement resulted in the recognition of an additional $112,299 loss in the three and six-months ended April 30, 2021. It is probable that the Company will receive a distribution of the bankrupt's assets, which is estimated to be in the range of 6% to 20% of the total claim.

22. Subsequent events

The Company evaluated subsequent events through June 10, 2021 the date these condensed interim consolidated financial statements were issued.

There were no other material subsequent events that required recognition or additional disclosure in the financial statements.
